

The Pro Mix Silo System

Now, get uniform, consistent mortar and grout mixes every batch

- Pre-blended for consistent batches—just add water.
- Pro Mix silo eliminates shoveling sand.
- Silo auger permits accurate control of batch size.
- Meets ASTM C270 specifications.

The key to more profitable block, brick, and stone projects

- Accurately blended Pro Mix mortar makes consistent mixes every time, especially colored mortar.
- Cuts typical mixing time in half and gives your mixer operator more time for other tasks.
- Reduces job injuries—no more hand shoveling sand or hand loading bags.
- Reduces job cleanup. No more half-filled cement bags to dump. No more frozen sand piles.
- Increases worker productivity and efficiency.
- Enhances your profit potential.

We deliver the Pro Mix silo and bags direct to your site.

When the job is finished, we'll pick up the silo or move it to your next job.

U-Mix Products Co.
Supplier of Pro Mix Bulk Mortar and Grout Mixes

Pro Mix 3,000-lb silo bags load directly into Pro Mix silo.

70-lb bags of mortar or grout are available for smaller batches.

Simple | as calling in your order

U-Mix delivers the mixing silo and 3,000-lb Pro Mix silo bags right to your job site. There's no charge for the silo when ordered with your mortar and grout mix. After your job is complete, we pick up the silo. 70-lb bags are also available for smaller batches.

Consistent | batch after batch

Pro Mix is already blended to just the right cement-sand formula for your job. Choose standard or colored mix options. With pre-blending, mixes are consistent batch after batch. With the silo's built-in auger, the operator controls the amount of dry material going into the mixer. Then, just add water and turn out batch after batch of uniform, consistent mortar, ready to use.

Works better | in inclement weather

With sand and cement already blended in the bags, you don't have to worry about wet or frozen sand or needing extra heaters or dryers. The sand is pre-dried before blending, which prevents bulking and ensures consistent mixes.

Cleaner | job sites

The Pro Mix Silo System does away with the need for extra sand piles and drastically cuts the number of paper bags to be cleaned up. The Pro Mix silo takes up less space and can be moved about the site as needed for worker efficiency. If necessary, order two—one for mortar, one for grout. Once the job is over we pick up the silos, reducing your cleanup work. We'll even move the Pro Mix silo to your next job site so it's ready to go when you get there.
